ADRIONET
ADRIATIC-IONIAN NETWORK
OF AUTHENTIC VILLAGES

This project is supported by the Interreg ADRION Programme funded under the European Regional Development Fund and IPA II fund.

Adriatic-Ionian Network of Authentic Villages -ADRIONET

The ADRION territories involved in this project are filled with small authentic villages, which are often located in extremely beautiful locations, including fluvial valleys, mountains, hills, rural peripheral or peripheral areas, in certain cases with a risk of depopulation and abandonment.

The main change of the project is to overcome the current marginalization, fragmentation and sub valuation of these territories by establishing a Transnational Network of "authentic villages" whose goal is to promote the preservation of natural and cultural assets, accompanying development based on social, environmental and economic sustainability, with better quality of life population, as a prerequisite for the comprehensive preservation of the environment as well as the attractiveness and satisfaction of visitors.

GENERAL PROJECT OBJECTIVE:

Establishment of a transnational network of ADRION "authentic villages" (along catchment / lake basins, hilly / mountainous / rural peripheral and peripheral territories) aimed at promoting the conservation of natural and cultural assets, striving for development based on social, environmental and economic sustainability , with a focus primarily on the quality of life and well-being of the local population, as a precondition for the comprehensive care of the mentioned territories, as well as for their attractiveness and tourist satisfaction.

SPECIFIC OBJECTIVES OF THE PROJECT:

- Promotion and testing of a transnational model of integrated territorial development, led by local communities, river / lake basins and mountainous / hilly / rural peripheral or peripheral areas
- Establishment of a transnational network of "Authentic Villages"
